DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-55 drawn to a method and a system comprising preserving confidentiality of sensitive information stored in memory, classified in class 713, subclass 193.
 - II. Claims 56-60 drawn to an apparatus selecting operating code for use by the end user device on the basis of the operational characteristics of the end user device and to transmitting to the end user device operating system code to enable continued use of the end user device by the user, classified in class 726, subclass 2.

Inventions (I) a method and a system comprising preserving confidentiality of sensitive information stored in memory (II) an apparatus selecting operating code for use by the end user device on the basis of the operational characteristics of the end user device and to a process enabling authentication of a user as subcombinations disclosed as usable together in a single combination.

The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention (I) a method and a system comprising preserving confidentiality of sensitive information stored in memory, classified in class 713, subclass 193 do not require selecting operating code for use by the end

user device on the basis of the operational characteristics of the end user device or transmitting an operating system code to the end user device to enable the end user device to transmit a message requesting authentication of a user (II) an apparatus selecting operating code for use by the end user device on the basis of the operational characteristics of the end user device and and to transmitting to the end user device operating system code to enable continued use of the end user device by the user, classified in class 726, subclass 2 do not require a determining whether confidentiality of the sensitive information stored in the memory store is to be preserved or an encryption module communicatively coupled to a control entity and a data bus encrypting data in accordance with an encryption key.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 44-51 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
